

Catering Consultancy

“Tenet transformed our catering tender from a potential minefield to a walk in the park”

Tendering for catering services can be at best time consuming and at worst a minefield! Which is why Tenet applies 10 years of experience and specialist expertise to ensure the

whole process operates as smoothly as possible.

Tenet offers a range of support services all tailored to the specific needs of the college, university or school, in question.

These services include;

- **Operations Review** - designed to identify the strengths and weaknesses of the current catering operation, our findings and recommendations are detailed in a written report, which is presented and discussed with the client.
- **Tendering** - Tenet undertake a full, compliant tender process which will include discussing provision requirements; producing and sending out tender documentation; hosting site visits; managing post tender discussions and producing contract documentation.
- **Monitoring** - Tenet ensure the appointed catering contractor is committed to delivering their tender proposal and meeting their stated objectives. It involves regular review meetings, production of a report each term and dealing with any other issues that arise.
- **Design and Planning** - Tenet provides a full range of kitchen, and refectory design and planning services, from a single piece of equipment to a total refurbishment, as a specific, or as part of an all encompassing, build project.

Tenet's specialist catering support services minimise the time you need to spend on tendering, whilst achieving the maximum potential of your catering provision.

After all why work harder when together we can work smarter?
