

Network and IT Services

Switch on technical know-how from Tenet for improved networks and systems

IT Networks Are The Backbone Of Modern Educational Establishments

Efficient and effective IT networks and infrastructure have become the backbone of modern educational establishments and the information they carry, the life-blood. At Tenet we understand that performance is paramount, and that it is vital that the IT infrastructure performs efficiently and reliably, delivering high levels of performance for both students and staff.

Tailored Solutions

The Tenet Technical Team endeavours to provide a quality service tailored to meet your requirements. Our experienced engineers understand the IT infrastructure demands of the education sector and can help schools, academies, colleges and universities achieve a reliable high-performance platform. Whether you are planning to integrate interactive e-mail, learning portals, intranets, or just straightforward desktop tools, Tenet IT specialists have the skills to assist.

Tenet's experienced resource can provide benefits in the following areas:

- **ILT Strategy Development**
to bring together the needs of differing user groups and establish a strategic direction to meet their needs;
- **Network Design**
for improving the effectiveness, speed and robustness of the network architecture and, where practical, eliminating identified single points of failure;
- **Outsourced Management**
for support of on-site staff, access to more experienced resource for key issues, and reducing risk associated with small staff groups;
- **Interim Management/Staffing**
for speedier completion of projects or covering key vacancies;
- **Project Management**
for an independent structured approach to new systems, ensuring resource needs are identified in advance, realistic targets set, and deadlines are met;
- **Multi-site Solutions**
a seamless network irrespective of distances;
- **E-mail Implementation**
to ensure effective communication for staff, students and governors, with appropriate security and system safeguards;
- **Learning Portals**
to enable the development and organisation of curriculum materials, improve access, extend opportunities for personalised learning and establish corporate ownership over teaching materials;
- **Intranets and Extranets**
to improve the efficiency of staff resources;
- **System Documentation**
so that systems may be efficiently maintained on an ongoing basis and that knowledge is effectively shared amongst staff;
- **Home-working Solutions**
to improve staff flexibility and efficiency.

Whether you are looking for a complete network or just a little advice, please call us on **01376 511411** or Skype 'tenetworks' or e-mail us at mail@tenetservices.com to discuss your needs further.
