

How to achieve Display Energy Certificates AND save energy and money

The Tenet sustainability services team, led by dedicated consultant Richard Dunning, offers a range of sustainability services to help you reduce energy use and achieve the new DEC.

education services

From October 2008 all Schools, Colleges and Universities will need a Display Energy Certificate...

The Certificate shows the energy performance of the building, comparing it to current benchmarks and indicating your CO₂ output. Tenet can save you time, energy and money and we will help your organisation to:

- identify ways to reduce waste, energy usage and costs,
- comply with legislation around sustainability issues,
- raise awareness of sustainability,
- achieve and organise DEC certification.

Tenet is the leading independent provider of procurement services for FE Colleges. It is able to provide support for sustainable procurement on either a consultancy, outsourced or implementation basis.

Please call the number below for our specific sustainability services information sheets. For further information or an initial chat please call Richard Dunning on **01376 511411** or visit our website www.tenetservices.com
